

Plants 9.1

Tools of Plant Production

www.CrosswordWeaver.com

ACROSS

- 2 – The changing of a liquid into a gas.
- 3 i – Watering plants so that only soil in the plant's immediate vicinity is moistened. Water is supplied from a thin plastic tube at a low flow rate.
- 5 – The act of circulating air so as to cool or freshen the air.
- 8 – The mechanical manipulation of soil for any purpose; but in agriculture it is usually restricted to the modifying of soil conditions for crop production.
- 11 – The specialization of agriculture concerned with the theory and practice of field-crop production and soil management; the scientific management of land.
- 12 – Something that drains or flows off, as rainwater.
- 15 – Any of several different types of heated, glass- or plastic covered structures used for the growing of plants.
- 16 i – A system of irrigation consisting of adding water at the highest point in a field and allowing the water to cover the soil.

DOWN

- 1 – The artificial application of water to soil for the purpose of increasing plant production.
- 4 – The process in which energy is emitted as particles or waves.
- 6 – The introduction of harmful substances or products into the environment.
- 7 – The opening left in the soil after the furrow slice has been turned by the turning plow.
- 9 i – A system of irrigating a small acreage by sprinkling from overhead pipes.
- 10 – To cut, reap, pick, or gather any crop or product of value, as grain, fruit, or vegetables.
- 13 – A method of irrigating in which water is run in small ditches, furrows, or corrugations, usually spaced close enough together for lateral penetration between them.
- 14 – The group of processes whereby earthly or rock material is worn away, loosened or dissolved and removed from any part of the earth's surface.
