Chapter 5 – Condensation Poster Assignment

Names _____

_____ points earned
26 possible points

From the reading in chapter 5 on Condensation, develop an educational poster that pertains to the following concepts of the chapter:

1. How do clouds form?
2. What are the different types of fog?
3. How does precipitation form?
4. What are the different forms of precipitation?
5. What roles do clouds play in our climatic system?

Requirements of Poster:

- Title/Heading
- Information as it relates to the above concepts of condensation and clouds.
- Photos or graphics related to the topics with labels (minimum of 2)
- Color used to enhance poster

Grading/Rubric:

Category	4	3	2	1
Information required on condensation, clouds and fog types. (x2)	Basic requirements addressed with additional information. Sources cited.	Basic requirements addressed. Sources cited	All but one required element included; sources may be left off.	Many items of importance have been omitted. No source.
Information required about precipitation.. (x2)	Basic requirements addressed with additional information.	Basic requirements addressed. Sources cited	All but one required element included; sources may be left off.	Many items of importance have been omitted. No source.
Photos/graphics including label	2 or more, easily relate to topic, label clear and easy to read from 3 feet.	2 photos, relate to topic, not all are labeled or are easy to read from 3 feet.	1 photo labeled correctly and easily read at a 3 foot distance.	1 photo and not labeled or labeled poorly
Attractiveness (x1.5)	Exceptionally attractive in terms of layout, design, use of color and neatness.	Attractive in terms of layout, design, use of color and neatness	Slightly less attractive because of messiness and overuse or underuse of color	Distracting because of messiness, color usage, layout and design
