

Roland-Story Meteorology Class

Chapter 9 – Weather Patterns

Video Production

Name _____

_____ points earned
20 points possible

In this assignment, each of you will be creating a video using photographs downloaded from the internet to explain the main concepts of weather patterns as indicated in your books. Your video will need to have pictures that best represent illustrations from this chapter. Your video will be 2 to 3 minutes long.

The program you will be using is called '**iMovie**'. If your computer won't work, then you will be using a Macintosh in the library.

Procedures: You may need to research out on 'atomiclearning.com' for more specifics on using iMovie if you are having difficulty and/or visit with Mrs. Huber in the library for assistance.

1. Research what pictures you will need Read through the chapter and come up with 20 to 24 pictures to be used..... no picture should last more than 6 seconds.
2. Create a new movie and place a title slide onto it.
3. Insert in your pictures. Place in any transitions.
4. Insert into your movie the music/song you will be using if you can't get this part done in 5 minutes or less, ask Mr. Taylor for help.
5. Put an ending slide onto your movie.

Grading:

Criteria	4	3	2	1
Length of video	At least 2 minutes long and not exceeding 3 minutes.	Between 1.5 minutes to 2 minutes.	Between 1 to 1.5 minutes.	Less than 1 minute in length.
Length of pictures	All pictures last for 6 or less seconds.	Any 1 picture last between 6 to 8 seconds.	Any 1 picture last between 8 to 10 seconds.	Any 1 picture last for longer than 10 seconds.
Quality of Pictures	All pictures represent a major concept of the chapter.	1 to 3 pictures do not represent a major concept of the chapter.	4 to 6 pictures do not represent a major concept of the chapter.	More than 6 pictures do not represent a major concept of the chapter.
Music	Music used is school appropriate			Music used is not school appropriate
Timeline	Video completed on time.			Video not completed on time.
